

Challenges with forest logistics

Public Seminar

Prof. Dr. Mikael Rönqvist

Université LAVAL, Quebec, Canadá

May 23

2:30 pm

Auditório da Biblioteca Central
Univ. de Trás-os-Montes e Alto Douro
Quinta de Prados, 5001-801
Vila Real, Portugal

Abstract

The seminar describes the current challenges facing the forestry industry, such as environmental concerns, labour constraints, logistics, natural disasters and public interactions, describing methods and approaches for dealing with these challenges, such as value chain management, analysis, optimisation, collaboration, digital twins, automation, big data, educational tools and decision support systems.

The seminar also aims to present various industrial applications and their impact, in which analysis methods and data sources are combined to address the challenges.

The seminar can be attended online
