

#Construir o Futuro

INTEGRATED PROJECT RN21 - INNOVATION IN THE NATURAL RESIN VALUE CHAIN TO STRENGTHEN THE NATIONAL BIOECONOMY

PROMOTING ENTITY

CoLAB ForestWISE - Collaborative Laboratory for Integrated Forest and Fire Management

PROJECT DESCRIPTION

The RN21 integrated consortium is guided by three key principles:

1. **Encompass the entire Natural Resin value chain**, from the forest to the end consumer, with a special focus on markets and new products derived from Natural Resin;
2. **Respond to key needs and specific opportunities** identified by sector stakeholders through strategic diagnosis and reflection;
3. **Contribute to the objectives of the Recovery and Resilience Plan (PRR), specifically component C12 – Sustainable Bioeconomy**, in coordination with other components, particularly C8 – Forests and C5 – Capitalisation and Business Innovation.

OBJECTIVES

OG1. Contribute to economic resilience and the promotion of a sustainable bioeconomy in Portugal through revitalisation of the Natural Resin sector;

OG2. Contribute to carbon neutrality and a more productive and resilient Portuguese forest;

OG3. Contribute to territorial cohesion;

OG4. Contribute to reinforcing the commitment to science and technology.
